Precambrian Research

Contents Vol. 78

Preface vii

The Itsaq Gneiss Complex of southern West Greenland; the world's most extensive record of early crustal evolution (3900–3600 Ma)
A.P. Nutman, V.R. McGregor, C.R.L. Friend, V.C. Bennett and P.D. Kinny 1

Extended history of a 3.5 Ga trondhjemitic gneiss, Wyoming Province, USA: evidence from U–Pb systematics in zircon
P.A. Mueller, J.L. Wooden, D.W. Mogk, A.P. Nutman and I.S. Williams 41

Hf isotopic composition and age constraints on the evolution of the Archean central Uchi Subprovince, Ontario, Canada
F. Corfu and G.M. Stott 53

Evolution of the Archaean Aulian Gneiss Complex, Middle Dnieper gneiss–greenstone terrain, Ukrainian Shield: SHRIMP U–Pb zircon evidence
A.V. Samsonov, I.V. Chernyshev, A.P. Nutman and W. Compston 65

3800 to 2500 Ma crustal evolution in the Anshan area of Liaoning Province, northeastern China
S. Biao, A.P. Nutman, L. Dunyi and W. Jiashan 79

The Wutaishan orogenic belt within the Shanxi Province, northern China: a record of late Archaean collision tectonics
K. Wang, J. Li, J. Hao, J. Li and S. Zhou 95

The oldest part of the Barberton granitoid-greenstone terrain, South Africa: evidence for crust formation between 3.5 and 3.7 Ga
A. Kröner, E. Hegner, J.I. Wendt and G.R. Byerly 105

Prolonged magmatism and time constraints for sediment deposition in the early Archean Barberton greenstone belt: evidence from the Upper Onverwacht and Fig Tree groups
G.R. Byerly, A. Kröner, D.R. Lowe, W. Todt and M.M. Walsh 125

The Messina Layered Intrusion, Limpopo Belt, South Africa: an example of in-situ contamination of an Archean anorthosite complex by continental crust
J.M. Barton Jr. 139

Pb, Sr and Nd isotope constraints on the Archaean evolution of gneissic–granitoid complexes in the southern São Francisco Craton, Brazil
W. Teixeira, M.A. Carneiro, C.M. Noce, N. Machado, K. Sato and P.N. Taylor 151

Zirconology of the Meeberrie gneiss, Yilgarn Craton, Western Australia: an early Archaean migmatite
P.D. Kinny and A.P. Nutman 165

Terrane accretion in the southwestern Yilgarn Craton: evidence from a deep seismic crustal profile
S.A. Wilde, M.F. Middleton and B.J. Evans 179

U–Pb ages on single detrital zircon grains from the Tasmiyele Group: implications for the evolution of the Olekma Block (Aldan Shield, Siberia)
O. Bruguier 197

Geochemistry and depositional environment of the gold-mineralized Proterozoic Koolpin Formation, Pine Creek Inlier, Northern Australia: a comparison with modern shale sequences
S.K. Matthäi and R.W. Henley 211

Chronology of the Mount Magnet granite–greenstone terrain, Yilgarn Craton, Western Australia: implications for field based predictions of the relative timing of granitoid emplacement
L. Schiøtte and I.H. Campbell 237

Whole-rock Pb/Pb isotopic ages of Late Archaean limestones, Karnataka, India
J. Russell, B. Chadwick, B.K. Rao and V.N. Vasudev 261

An interpretation of boron contents within a Palaeoproterozoic volcano-sedimentary succession: Pretoria Group, Transvaal Supergroup, South Africa
P.G. Eriksson, B.F.F. Reczko and D.P. Piper 273

Discussion
Kinematics of a major fan-like structure in the eastern part of the Sveconorwegian orogen, Baltic Shield, south-central Sweden — comment
P.-G. Andréasson and A. Rodhe 289
Kinematics of a major fan-like structure in the eastern part of the Sveconorwegian orogen, Baltic Shield, south-central Sweden—reply
C.-H. Wahlgren, A.R. Cruden and M.B. Stephens 293

Book Reviews
Crustal Evolution of Singhbhum – North Orissa, Eastern India, by A.K. Saha — B. Chadwick 297
Geology of Karnataka, by B.P. Radhakrishna and R. Vaidyanadhan — B. Chadwick 297
The Geology of South Australia, Vol. 1. The Precambrian, by J.F. Drexel, W.V. Preiss and A.J. Parker (Editors) — M. Walter 298
Archean Crustal Evolution, by K.C. Condie (Editor) — C.L.R. Friend 299
Geology of Western Gondwana (2000–500 Ma). Pan-African–Brasiliano Aggregation of South America and Africa, by R. Trompette — R. Caby 301

Erratum 303
